# STIXO LAUNCHES NEW PRODUCT RANGES FOR THE SIGNAGE INDUSTRY

BY STIXO SIGNAGE SUPPLIES

**Within the construction and signage industries, the popularity of Aluminium Composite Panels 'ACM' and 'ACM-Lite' has increased over the past few years. Its uses have grown under the cover of energy efficiency, affordable pricing and construction possibilities. These materials are designed for ventilated façades, as well as their renovation or rehabilitation.**

STIXO Signage Supplies, based in Crown Mines, Johannesburg, are excited to launch their impressive range of Aluminium Composite Panels 'ACM' and 'ACM-Lite' to the Southern African market and beyond.

Through consistent research and development, and tireless efforts to always stock and supply the very best to the signage and construction industries, the company have once again stood true to their commitment and have delivered.

'We have always kept our ears close to the ground when it came to satisfying the needs of our valuable customers,' said Asif Sidik, Managing Director, STIXO Signage Supplies. 'And due to the ever increasing interest and requests made by our customers for the acquisition of top quality Aluminium Composite Panels and Foam Board, we decided that the time was right to make it readily available and affordable.'

The aluminium composite panel has the ability to transform, making it a versatile material that can be used for the construction of risky and creative designs. It is ideal for the construction of areas of the façade that would be impossible with other materials. There are also endless possibilities of what can be achieved with STIXO's ACM Lite range, which suits the needs of the signage industry.

Further great news to the advertising, building, manufacturing and furniture industries is the simultaneous launch of the STX Foam Board range. STIXO Signage Supplies endeavours to always live up to its name as a one stop signage supplies outlet, and this has been further achieved with their complete range of Foam Board, ranging from 2mm to 20mm thickness and various sheet sizes to suit all customers' needs.

The ACM, ACM Lite and STX Foam Board ranges are names that customers can start getting very used to when they need to rely on a quality product and one which will be readily available in an array of finishes, sizes and different coloured sheets.

STIXO Signage Supplies is waiting to introduce their complete range and prices to customers, along with the specifications. They aim to satisfy all needs and requirements.
