FIBRE PROCESSING AND MANUFACTURING SETA

Established in 2011, the Fibre Processing and Manufacturing (FP&M) SETA consists of 13 sub-sectors namely the clothing, footwear, forestry, furniture, general goods, leather, packaging, printing, print media, publishing, pulp and paper, textiles and wood products sectors. Although classified individually, the sub-sectors are closely integrated. Together they create tremendous value in the lives of consumers, by converting lumber, pulp, natural or synthetic fibres, animal skins/hides into finished products such as furniture, clothing, shoes, protective equipment, paper and paper board, printing (books, magazines, etc), industrial fabrics and extending into high-tech applications in many different industries (automotive, health and building construction to name a few).

MIDCOMP (PTY) LTD

Midcomp (PTY) Ltd is a 31-year-old company specialising in the sales, service and support of large format digital printing and finishing equipment. We have a full spectrum of solutions from small print and cut systems capable of short-run production through to high volume printers. We also specialise in Zünd Swiss cutting systems for the digital finishing with a high degree of automation, reducing both waste and reliance on resources.

Midcomp (PTY) Ltd offers world-class support, with a team of 13 factory-trained field service engineers that have the fastest measured response times in the industry. We also offer our customer's a production backup facility at our Innovation Hub. In the event of a customer experiencing technical failure, they can continue production at our facility while a field service engineer resolves the problem, thus ensuring that deadlines meet.

Midcomp (PTY) Ltd is the only company to offer a Pay Per Use (PPU) where customers only pay for the square meters they print. It is a smarter way to print with a fixed cost per square meter rate that is customised around your business. This rate includes ink, printheads, spare parts, service maintenance kits and labour. No unexpected payments for repairs to your printer if it breaks

down. This programme is available for the HP Latex range.
 As part of our "Catalyst for Growth" promise we have evolved into a group of three focal companies which includes Midcomp Azero (Large format printers and plotters) and Midcomp Consumables(Digital print media).

HARDWARE & SOFTWARE BRANDS: HP, ZÜND, JHF, KLIEVERIK, FOTOBA, SUMMA, KALA, CONTEX SCANNERS, BARBIERI, CALDERA, SAI, IDIGIT, ONYX

PERFECT LASER TECHNOLOGIES

Perfect Laser started in Newlands, Cape Town, in early 2015. The company has grown to be the most diverse business machine company in South Africa. Two fundamental philosophies drive us: Service and Innovation. We have introduced a number of firsts in SA. We write and compile our own Technical User Instruction Guides. Our CO2 Laser tube power performance validation centre is the only one operating in Africa. Our development of range finding proximity sensors is world class. Our specialist R&D division custom builds fibre solutions for clients. Our Materials Substrate Test Kit supplied with our entry level machines is unique. We offer free use (within reason) of our fibre laser cutter in Johannesburg. We have regular combination laser and CNC router deals.

PRINTING SA

The official voice of the print, pack, sign and visual communications industries. We provide an array of services to members of the federation from conferring, consulting, training and campaigning for the long-term sustainability and future growth of the industry.

We represent our members on various statutory bodies, including the FP&M SETA, SACCI, regional Chambers of Commerce, Proudly SA and we are the official association for FESPA in Africa. Printing SA provides commercial, technical and legal advice, HR, IR & B-BBEE consulting services for our members. As the largest training provider for our sector, we offer an array of training interventions for those wanting to increase their knowledge, technical skills and expertise in the industry.

SOUTH AFRICAN TYPOGRAPHICAL UNION

This is our story and why we have been in the business for 124 years. Throughout the years the South African Typographical Union has concentrated on organising the technical employees in the print and packaging sectors. However, due to technological changes in the industry and the reduction of technical workers, it had to amend its Constitution to take in many other Allied Sectors.

The Conditions of Employment which apply to members in the Printing, Newspaper and Packaging Industry are in many cases better than those which most other unions have been able to negotiate for their members, and are in most cases, better than the Basic Conditions of Employment Act. Since the inception of this Act, employers have been attempting to change our members' conditions of employment to those of the Basic Conditions of Employment Act. This has the effect of reducing our member's conditions of employment to those of the Basic Conditions of Employment Act which are less favourable than our members' present conditions.

Remember that the Basic Conditions of Employment Act only sets out the minimum conditions an employer can employ a person on. SATU has vigorously opposed these changes, as the conditions of employment which our members enjoy have been negotiated over the course of many years.

SATU has amended its Constitution to extend its scope to include the following occupations: Stationery Outlets, Book Shops, Publishing Houses, Advertising Agencies, Screen and Sign Display Sectors, Photocopy Shops, Printing Suppliers, Graphics and Graphic Design and Visual Communications.

3 Appel Road, Kramerville, Sandton, 2090

U-PRINT SA

We sell our own original print technology

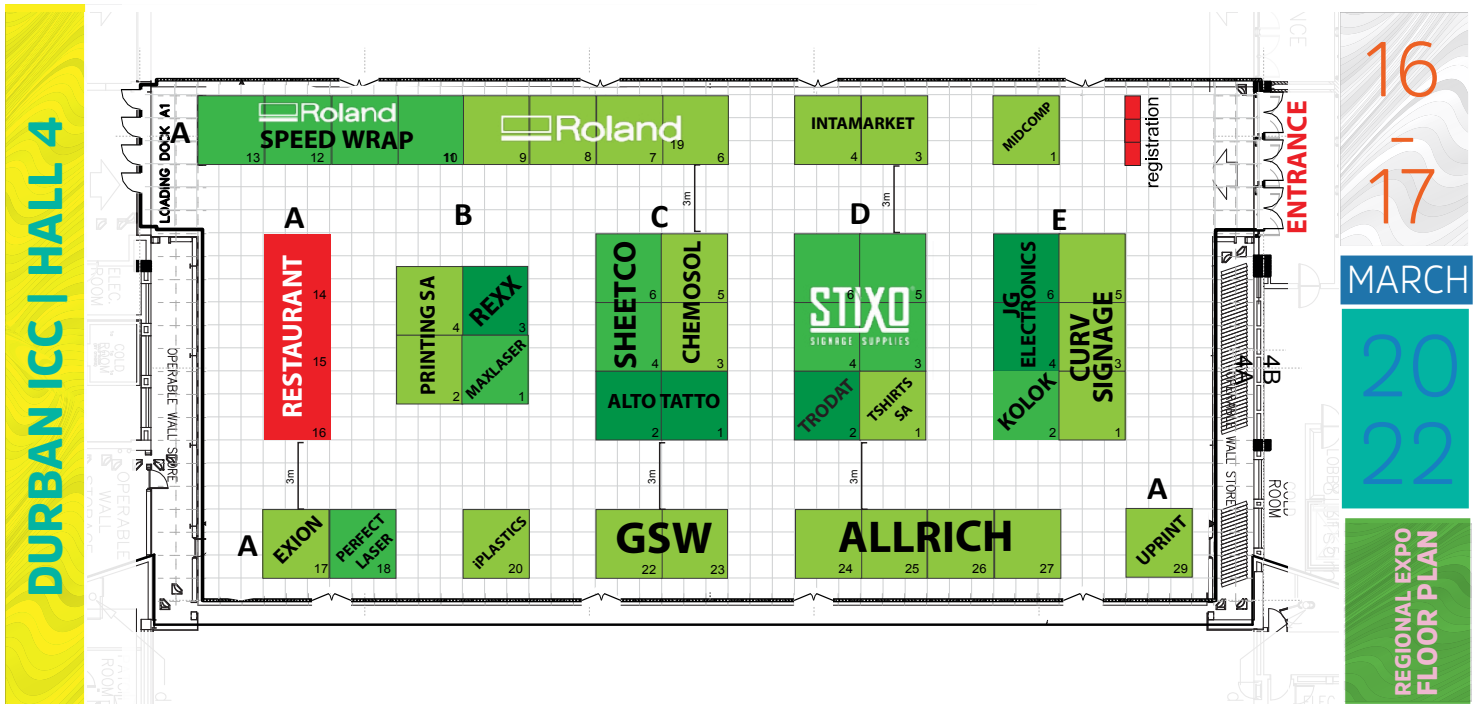

which has the world's first chemical transfer process. The printer we use is an OKI printer engine. We convert the fuser unit into a new modification, allowing for the paper to pass through the printer without the ink (toner) being fused (dried) to the page.

Our modification, including our unique RIP software, gives birth to chemical transfer printing and heat transfer all in one printer. You no longer need sublimation products, heatpresses or UV printers to print on limited items. The U-Print Chemical transfer printing process can brand on every single surface on the planet. When we say every surface, we mean it.
