

Allrich Exhibited Specialty Vinyls And Acrylic Bending Machine

Allrich exhibited the ABM1300, which can soften and bend acrylic, Plexiglas, PVC, PC, ABS, PP and more, at the Sign Africa Durban Expo. The machine also includes a water pump and water tube.

The machine is widely used in school technical courses, building models, decoration engineering, display cases, market shelves, advertising light boxes and artware making. It is small and portable and can be used anywhere.

Other products showcased:

Creative, versatile and durable, Super Clear Vinyl can be used to create designs on glass in every conceivable marketing and branding environment.

It can be applied to glass without compromising light transmission or clarity.

Unprinted areas remain completely transparent, while printed areas can be transparent, translucent or even completely opaque. This, coupled with high resolution colour printing, gives designers and artists a whole new canvas, or 'glass', on which to create arresting graphics that transcend the usual profile cut frosted vinyl and simple window vinyl. Applications include branded, retail, hospitality and corporate environments, where there are glass doors, walls, partitions, windows or skylights.

One Way Vision Vinyl perforated window graphics sign film features punched holes on self-adhesive

materials, using pinhole imaging principles. The structure of this film is a two-layer ink absorption liner. For general one-layer liner, the holes will be easily blocked by the UV ink during printing by a UV printer, thus it will lose the vision function. Based on a two-layer liner, UV ink can be absorbed by the liner, so it can be printed on by UV printers.

Steel gazebos are a popular choice due to their affordability and efficient and hassle-free form of advertising for outdoor events such as sports days or corporate functions. These lightweight gazebos are an ideal branding solution, are fully collapsible, easy to set up and functional as they provide shelter with their water-resistant canvas canopy. Easy to set-up, they are perfect for trade shows and golf day events.

Allrich have relaunched their steel gazebo range in both 2m and 3m sizes, and they are now available in options for premium heavyweight steel gazebos and budget steel gazebos. The company implement a large variety of different design and assembly techniques to ensure the product features high quality, durability and affordability, and stock a large gazebo range with options for every budget and application, from 2m x 2m gazebos to 6m x 3m heavy duty deluxe aluminium gazebos.

Other products included: promotion counter; zig-zag brochure holder; wall banner and director's chairs. The Sign Africa Durban expo was sponsored by Roland and Stixo.
