

MAKE YOUR MARK, SHOW YOUR COLOURS!

If you're in the market for a top quality, leading-brand laser marker or UV flatbed large format printer, Kemtek is happy to oblige with the **widlaser F200** and the **Epson SureColor SC-V7000** respectively. Both of these excellent machines are backed by Kemtek's incomparable levels of after-sales support and technical expertise.

Widinovations Widlaser F200

A laser marker that effortlessly combines intuitive ease of use, precision and a robust design, the exceptional widinovations widlaser F200 is at home in any printshop or workspace.

From asset tracking and protection to branding and corporate gifting, the F200 has multiple applications and can add value in multiple contexts.

Allowing users to mark several materials in a single process, with double point motorised focus to facilitate use, the F200's user-friendly software includes powerful tools that are suitable for beginners or professionals.

Along with the F200, Kemtek also distributes a variety of widinovations dependable laser cutting, engraving, laminating and CNC equipment under the widlaser, widlaminator and widCNC brands.

Epson SureColor SC-V7000

The Epson SC-V7000 takes UV large-format flatbed printing to a whole new level of precision and colour registration.

Designed to transform your customers' retail and outdoor signage, window displays and much more, the SC-V7000 enables them to stand out from the crowd in busy spaces.

The combination of the class-leading array of vivid, eye-catching colours that can be achieved by its UltraChrome UV 10-colour inkset, and large sheet size, puts clear blue sky between the SC-V7000 and its competitors.

In addition to the SC-V7000, Kemtek also distributes a wide range of other Epson SureColor large format signage, display and photo printing and proofing models.

For more information on these products, contact Mags Govender on +27 (0)11 624 8000, email him at magsg@kemtek.co.za or visit our website at www.kemtek.co.za.
