

OKI™ White Toner Laser SYSTEM

The OKI based system is perfect for both beginners and pro's alike and can easily handle more demanding volumes.

White is printed in a single pass and with the optional RIP you get accurate costing and maximum flexibility in your artwork which saves you more toner and thus money.

FILM FREE WATERSLIDE LASER DECALS

You can print white onto film-free water slide laser transfer paper using the OKI white toner printer as it has a white toner cartridge. With the film-free waterslide, only the print from decals is left behind after applying the waterslide on substrates like stone, candles, glass, ceramic, and more. Apply using film-free glue and remove the film backing.

1 Year warranty on heat press and printers. (terms and conditions apply)
