COLORADO 1650 – THE FLEXIBLE CHOICE

HIGH-SPEED PRINTING. LOW RUNNING COST.

Produce luxurious designer wallpaper, stunning decals or striking front- and backlits that make people stop and take notice with the Colorado 1650. With unattended printing the Colorado 1650 allows you to concentrate on other jobs without having to monitor printing outputs and manually assisting with media feeding or roll winding.

The Colorado 1650 was developed for non-stop printing and unmatched productivity:

- Online media switching
- Ink refill while printing plus lower ink consumption
- Robust prints without lamination
- Print matte, gloss, or mixed matte and gloss in one go

ONE CLICK. TWO FINISHES. ONE PRINT.

FLXfinish+ on the Colorado enables you to print high value applications with a velvety matte finish for interior décor or a brilliant gloss finish for display and packaging, and now mixed matte-gloss applications.

Combined with the benefits of UVgel technology, you can now produce prints that combine a matte and gloss finish without an extra varnish channel.
